

Schools & colleges: workshop overview

Status

Proposed commissioned Green Skills and Education programme. Sessions are a developed concept, not yet launched or proven. No workshop date is confirmed by downloading this overview or sending an enquiry.

Who it could support

Schools, colleges, school leavers and career changers exploring retrofit, renewable energy and energy-efficiency roles in the North East.

Proposed workshop

One 60-minute class session: a plain English introduction to warmer homes and green jobs, three role examples, a group skills-matching activity and a discussion of education and training routes.

What we would agree together

Age group, class size, curriculum fit, access needs, venue, safeguarding arrangements, date preferences and the commissioned scope. Fees are agreed privately before paid preparation.

Learning and feedback

Proposed outputs include learner questions, a brief feedback activity and a summary of themes. These are programme plans, not delivered results. Personal details should not be included in public reports.

NEEF's role

NEEF provides awareness and signposting, not accredited training or a qualification. Recognised education and training providers set entry requirements and certify technical competence.

Request a conversation

Use the School/College Workshop request on www.northeastenergyfutures.co.uk/green-skills or email hello@northeastenergyfutures.co.uk. Include your organisation, age group, group size and preferred dates; avoid pupils' personal information.
